

Zebra ZQ520 – MC67/MC55 Dacompac™

Convenient Carrying and Charging Accessory

Double up on efficiency! Now your mobile workforce can carry two of today's most popular mobile devices at the same time and charge both at the same time through a single source. Ideal for route accounting, direct store delivery, and field service and sales operations, Zebra's ZQ520 Dacompac™ provides a single, convenient carrier for Zebra's rugged ZQ520 mobile printer and Zebra mobile computer.

Separate versions of the ZQ520 Dacompac™ are available to support your Zebra MC67 or MC55 mobile computer.

This integrated solution makes mobile workers' jobs easier and more productive. They can use the ZQ520 Dacompac™'s shoulder strap or carry it by its solid handle to customer visits—then cradle it on their arm like a painter's palette as they enter data and print receipts, invoices, inventory pick tickets, etc., rather than fumble with separate mobile devices attached to their belt.

Save Money, Save Time

The ZQ520 Dacompac™ flexible features will save your company money, and increase productivity so your mobile workers can spend more time with your customers.

- **Simultaneous charging**—Both the printer and handheld computer can charge simultaneously via a single source, so there's no need to purchase separate chargers. LED indicators show charging status and error conditions.

This feature, combined with one of the single charging options shown on the back, saves your company money... saves space in the vehicle or settlement/field service dispatch center... and saves users time by simplifying the charging process.

- **User flexibility**—Easy device release makes it simple for mobile workers to use the printer and computer individually as they wish. It also minimizes your company's downtime and spare pools users can continue using one device while the other is serviced. Plus, integrated feet let users stand the Palette up while they type into the handheld or perform other tasks.

- **DEX integration**—A built-in DEX interface allows easy integration in direct store delivery operations.

Specifications at a Glance

Standard features

- Easy-release slot for a MC67/MC55 mobile computer
- LEDs for indicating charge status
- Bluetooth / WiFi (optional) interface between the printer and handheld
- Rugged, overmolded plastics

Operating characteristics

Environmental

- Operating temperature: -20° C/-4° F to 55° C/131° F
- Charging temperature: 0° C/32° F to 40° C/104° F
- Storage temperature:
-30° C/-22° F to 65° C/149° F with printer/battery
-10° C/10° F to 70° C/160° F with power supply
- Operating humidity: 0% to 90%, non-condensing RH
- Operating humidity with power supply: 20% to 80% non-condensing RH
- Storage humidity with power supply: 10% to 90% non-condensing RH
- Automotive Standards

Electrical

- **Input voltage 10-30 VDC**
- Maximum recharging current 2.2 A.

Physical characteristics

- Dimensions:
31,5x30,2x7,5cm
- Weight: 1,05 kg

ZQ520 Dacompad™ Charging Options

Dacom offers the following accessories for charging

AC Power Adapter

With the AC Power Adapter, connect your ZQ520 to a wall outlet at the end of the shift to charge both the printer and terminal at once.

In-Vehicle Mobile Charger

A convenient and cost-effective means of charging your Dacompad™ in the vehicle without a vehicle cradle.
