

# HEALTH AND SAFETY IN YOUR SPACES

Kiosks designed for automatic and safe access control

Private and public companies more and more see demand to provide automated options in addition to the classic access control operations for safety and hygiene in spaces. Customer satisfaction paired with touchless features are mandatory in modern and flexible facility management.

Touchless

Sanitizing gel dispenser

High capacity gel tank

Functional shelf

Intuitive UX

Ready for use

Fever and mask detection

Designed with VR detection

## Benefits:

- Maximize health protection with touchless kiosks
- Optimal solutions for medical environments
- No contamination of the gel thanks to inox steel tank
- Electronic control of the delivery of the quantity of gel (1ml)
- Lower gel recharge frequency and easy refill
- Installation and maintenance efficiency
- Company brand image supported by an elegant design

## KIS UltraSlim & Stilish Sanitizing Gel Dispenser

This is a gel dispenser with ultra slim chassis suitable for every context of use. The electronic sanitizing gel dispenser ensures touchless and pleasant hand sanification.

- Indoor
- Electronic sanitizing gel dispenser
- 3L sanitizing gel tank (high-performance gel option)
- Functional shelf to hold masks, glove boxes, or flyer
- No external plug needed (battery included for gel dispenser)

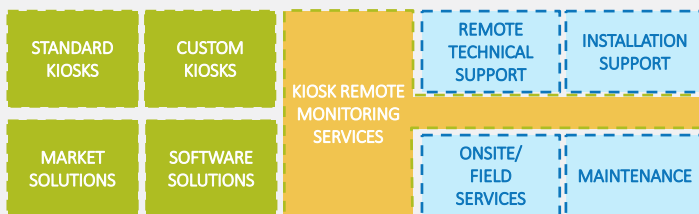

## KIS UltraSlim & Stilish Body Detection Kiosk

This kiosk expands gel dispenser functionalities thanks to a face recognition access controller for body temperature measurement and mask recognition.

- Indoor
- 7 Inch display
- Thermal AI camera for accurate and fast body temperature measurement and mask detection
- Embedded software for access control ready-to-use
- Electronic sanitizing gel dispenser
- 3L sanitizing gel tank (high-performance gel option)
- Functional shelf to hold masks, glove boxes, or flyer
- POE or plug power supply

## Flexible Solution Services

KIOSK's Solution Services are flexible in design, allowing customers to mix and match the service options / support hours to match specific deployment demands. KIOSK's services are designed to maximize the security and field uptime of a self-service network. Kiosk options include:

## Safe recognition access controller

- Support mask detection, report alarm of abnormal events without wearing a mask
- Face recognition algorithm
- Face detection box - the largest face among faces that appear at the same time is recognized first

- Accurate recognition in backlight and front light
- Auto illumination reduces light pollution
- Various unlock status display modes protect user privacy
- Video Door Phone
