SpacePole Essentials®

Mounting solutions for HP Engage One Pro

Bringing the benefits of SpacePole solutions to HP's Engage One Pro point of sale system

Ergonomic Solutions has partnered with HP to design and manufacture SpacePole solutions specifically for the HP Engage One Pro. These can be supplied as either HP or SpacePole part numbers:

- **Flexible single mount:** HP part no.: 2W7M4AA/SpacePole part no.: HP0014
- **Back-to-back mount:** HP part no.: 2W7M3AA/SpacePole part no.: HP0015

These mounting parts are fully compatible with other mounts in the SpacePole Essentials range. They enable tilt and rotation, and the integration of peripherals such as the new HP customer facing display, printers and scanners. They are also suitable for all three sizes in the HP Engage One Pro range, in either landscape or portrait modes, or as an alternative to the HP native mount when you need to create more counterspace and require more flexibility and movement. This enables you to build a complete solution to meet the needs of your business. POS, self-service, kiosk or other solutions can be easily and ergonomically created. This could apply in retail, hospitality, travel or healthcare environments.

In addition, the Engage One Pro can be retrofitted to any SpacePole mounting solution already installed. If you decide to add additional peripherals at a later date, these can be simply added to the SpacePole mount, providing excellent protection of investment.
